THE ORIGINAL ACRYPOL+

Demand it by name

Trust the best, don't touch the rest, and that's not just manufacturer speak it's the verdict of thousands of specifiers and contractors who've successfully used Acrypol + on literally millions of m² of roof refurbishments all over the UK. It really is the only high performance solution to give immediate waterproofing protection even in unpredictable weather – no other product is as versatile, reliable or user friendly. FACT.

Acrypol + has attracted many inferior products onto the market but continues, year after year, to be asked for by name as its exceptional performance goes unmatched.

Acrypol + features such a high quality chemical compound that

it can literally be used 365 days a year and has become the professionals' choice for superb performance and fast, user friendly properties.

Even if the substrate has been saturated, Acrypol + allows the roof to breathe – trapped moisture evaporates harmlessly without causing ponding or damp roof decking.

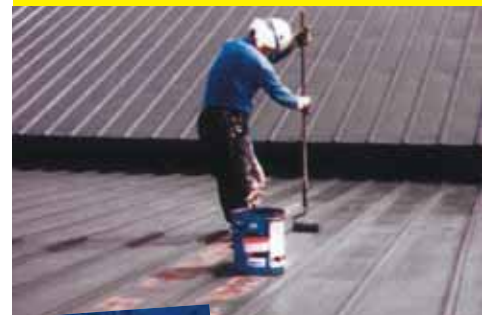

Brush applied as a semi liquid paste, Acrypol + dries to form an ultra tough, seamless flexible overlay, encapsulating the roof in just one coat. It is perfect for failed industrial, commercial or domestic flat roofs and offers an excellent, cost effective alternative to total replacement.

Demand it by name – don't risk anything else. [ENQUIRY 1](#)

LIKE NEW IN JUST ONE APPLICATION

Leaky, rusty profiled metal roofs and structures are a thing of the past – and only Acrypol's Metal 1-Kote will give such superb high spec results in just one easy application, that the building continues to look and perform like new for years.

Manufacturer, Acrypol says Metal 1-Kote is a massive breakthrough in protecting and preserving the life, looks and performance of metal buildings.

Perfect for waterproofing and renovating all profiled metal including plastic coated metal, Metal 1-Kote means for the first time there's a real alternative to costly, total replacement.

Some of the most advanced materials around have been used to perfect Metal 1-Kote's formula and it is unlike anything else. Its users have been stunned by its fast acting, protective composition.

Even tears in metal can be repaired using Metal-Patch and Metal 1-Kote for a permanent leakproof remedy. Always ask for Metal 1-Kote by name, accept nothing else – inferior products may look similar but when it comes to performance Metal 1-Kote is in a league of its own. [ENQUIRY 2](#)

See the transformation...

An incredible solution which brings faded, discoloured, tired looking concrete tiles back to their former glory – and looking as good as new has been launched by Acrypol Products and it is delighting property owners all over the UK.

Nu-Life from Acrypol literally gives the look of a new roof, turning back time and recreating the tiles' original colour. Nu-Life also reduces stress on the structure by removing lichen, moss and fungi build up and protecting against tile porosity and frost damage, improving drainage,

AFTER

and generally making the roof look and perform more effectively.

Requiring only high pressure cleaning, an anti fungal solution is applied followed by two coats of Nu-Life to complete the job giving a natural, attractive finish.

Due to demand, Acrypol is seeking more independent operators to respond to the great interest shown by homeowners and say this product is set to bring new life to dull roofscapes everywhere. [ENQUIRY 3](#)

No more slip-ups – use Quartzdek

Acrypol Products' Quartzdek means it's ultra easy to combine high performance waterproofing with a safe slip resistant surface perfect for balconies, walkways, exterior stairs, risers, and even roof gardens.

Using real quartz granules and a high performance waterproofing solution, Quartzdek is one of the most revolutionary and versatile slip resistant surfaces around.

Fast and easy to install, Quartzdek can improve both the aesthetic appeal and waterproofing integrity of any area demanding a safe, slip free surface for foot traffic.

A tough polyurethane waterproof coating is roller applied and topped off with real quartz granules. A sealing layer of resin completes the treatment preventing water damage to concrete, cement, asphalt, even quarry or ceramic tiles.

Quartzdek takes just a matter of hours to dry and comes in three attractive colour mixes. [ENQUIRY 5](#)

Repairs in seconds, seals for years

Need to repair, seal, bond, or join almost any material? Use Acrypol's Wetseal, an incredible epoxy putty which can be mixed by hand and when applied forms a permanent seal, rock hard, even under water.

Wetseal is probably the most versatile and user-friendly product on the market and is supplied in a handy pliable rod – it is a must for every business, tradesman and home.

Simply break off the amount required, mix by hand and apply. Once cured the permanent seal may be sanded or even drilled. Wetseal is perfect for stopping leaks or making emergency repairs quickly.

The pocket-sized pack is polythene wrapped so it can be used and re-sealed easily and it's fast making an appearance in every single tool kit across the UK.
