

ACRYPOL + TRIED AND TRUSTED BY LOCAL AUTHORITIES AND DISTRICT COUNCILS

Local Authorities and District Councils looking for an exceptionally reliable, fast, safe, roof refurbishment product, from a company with an outstanding track record of success are turning to Acrypol +.

With increasing pressures placed on public sector specifiers to combine cost-effectiveness with performance, Acrypol +, from manufacturer Acrypol Products Limited, is being repeatedly named as an industry favourite.

Monmouthshire County Council required immediate action to refurbish and up-grade the roof of Caldicot Comprehensive School. The 450 SqM area, originally a mastic asphalt specification, was beginning to fail and action had to be taken to prevent any internal damage. Acrypol +, requiring just one application to fully encapsulate, protect and waterproof the building was, therefore the ideal choice.

Acrypol + which is brush applied, also means work can be carried out in absolute safety – without the use of hot bitumen on site, and without the expensive and time consuming disruption associated with the removal of old, failed roofing materials.

Acrypol + features a highly advanced “one-coat” chemical structure. It will give immediate, tough, durable waterproof protection, stopping leaks and encapsulating the entire roof.

Any trapped moisture in the roofs substrate is allowed to evaporate harmlessly into the atmosphere and even the threat of damp, unpredictable weather will not stop the product’s unique compound from bonding immediately.

Acrypol + is available in Medium Grey or Solar White from leading builder’s merchants and specialist roofing merchants nationwide. Always ask for Acrypol + by name. Insist on the “original” professional’s choice.
