

# Project Profile

## St John Fisher Roman Catholic School

A roofing product with an exceptional track record for performance and quality is being depended upon, more and more, by Local Authority specifiers, including those responsible for schools and educational buildings.

Acrypol + is one of the World's most advanced waterproofing solutions. It is proven to offer superb waterproofing properties combined with cost effective, fast application. St John Fisher Roman Catholic School is one of the most recent additions to Acrypol's growing portfolio of public sector specifications.

The school, in Middleton, Manchester, required urgent and immediate action to re-waterproof 1,100 SqM of it's failing mastic asphalt roof. The specialist consultant working on behalf of the St John Fisher School, Hulme Upwright & Partners had regularly chosen Acrypol + during a highly successful relationship spanning some 9 years.

Acrypol + means the roof refurbishment is carried out in complete safety – without the use of hot bitumen on site, and without the expensive and time consuming disruption associated with the removal of old, failed roofing materials.

**Client:** Hulme Upwright & Partners

**Project:** St John Fisher Roman Catholic School

**System:** Acrypol +
